

District-Wide Diagnostic Screeners

The Universal Screeners are used as a diagnostic tool to determine the student’s base level reading and math skills and allow the teacher to use the information to design and personalize the instruction for each student. The kinder screener is supported with instructional videos that students can access online. All the reading screeners will measure phonological awareness, letter knowledge, vocabulary, decoding and spelling. Teachers can assign practice through the use of free sites such as readingbear.org or free apps that are included in curriculum unit guides or virtual text through HMH and other web based sources. Imagine Learning (IL) will provide the Reading Universal Screeners in 3rd-8th and Math Universal Screeners in 1st-8th. Both Imagine Learning Programs use adaptive technology to develop individualized learning paths for students based on screener results. Additionally, teachers are able to augment the student’s learning path to address content in alignment with Judson ISD Curricular Documents.
